TABLE OF CONTENTS

About Waste Business Journal 1

About James Thompson, Jr. 1

1 HISTORY & BACKGROUND 2

1.1 Recent Events..... 2

Waste Generation Falls with Economic Downturn 2

Companies Manage to Raise Pricing to Offset Decline in Volume 2

Resurgence of Industry Consolidation 2

Consolidation will Help Companies Maintain Pricing Discipline 3

Economies through Vertical Integration 3

Fewer Landfills Make Them More Valuable and Vulnerable at the Same Time 3

Collapsing Commodity Prices for Recovered Materials 4

Supreme Court Rules on Flow Control with Implications for Municipalities 4

Trouble for SPSA may Illustrate Perils of Municipal Alliances 5

1.2 Economic Outlook 6

1.3 History 7

Highly fragmented, low technology, and low cost 7

Changes in regulations 7

Waste disposal crisis of the late 80’s 8

Economic and political incentive to increase recycling 9

Incentive to shop for lower disposal fees 9

Barriers to mobility: Flow control, Import bans and other legislative obstacles 9

Waste is increasingly hauled further away from the source of its generation 10

Effect of regulation on industry participants 10

Overbuilding and excess disposal capacity 10

Rising role of the private sector 10

Rising materials recovery rates 11

Problem of demand and capacity for recovered materials 11

Reengineering manufacturing to take advantage of recovered materials 11

Maturing market for recovered materials 12

2 SOLID WASTE MANAGEMENT 13

2.1 Industry Overview: Size and Segments 13

Defining the Market 13

Contents

Key Segments	15
Key Players	17
Supremacy of the publicly traded companies.....	19
Pricing Discipline.....	20
Rising Fuel, Equipment, Insurance and Labor costs may provide incentive to hold pricing	20
Waste by Rail.....	21
Personnel.....	21
M&A Activity.....	22
Vertical Integration through roll ups and “tuck-ins”	23
Efficiency through Technology and Route Optimization.....	24
Full Service Approach.....	24
Repackaging themselves as Green Companies	24
2.2 Industry Overview: Total Generation, Recovery & Disposal.....	26
Municipal Solid Waste Generation and Disposal Trends.....	26
Industry Consolidation.....	28
Growing Network of Transfer Stations.....	28
Solid Waste Management Segments	29
2.3 Collection Markets	30
Waste Collection	30
2.4 Processing Markets.....	31
Transfer and Processing	31
Helped by higher pricing.....	32
Diversion and Product Stewardship	34
Take Back Programs	34
2.5 Disposal Markets	36
Disposal Segment.....	36
C&D Down	38
2.6 New Disposal Technology.....	39
2.6.1 Bioreactors.....	39
2.7 Landfill Development and Operating Costs	41
Development Costs	43
Construction Costs	43
Closure and Post Closure Costs	43
Annual Operating Expenses	43

Other Economies-of-scale.....		44
Resource Recovery.....		44
2.8 Incinerator Operating Costs.....		46
2.9 Waste Management Market Dynamics and Geographic Distribution.....		49
2.10 Movement of Waste and Attempts to Control its Destiny.....		54
2.10.1 Flow Control.....		55
2.10.2 Waste by Rail.....		58
2.10.3 Interstate Waste Movement.....		58
2.11 Processing and Disposal Volume by Region.....		62
3 COMPETITION IN SOLID WASTE MANAGEMENT.....		68
3.1 Top Solid Waste Management Companies.....		77
Leading Waste Management Firms.....		77
3.2 Leading Firms in Waste to Energy		80
Largest Waste-to-Energy Companies Ranked by Total Capacity		80
3.3 Industry Mergers and Acquisitions.....		85
3.4 Municipal Solid Waste Authorities		96
4 LANDFILL CAPACITY		97
5 PRICING.....		106
6 MATERIALS RECOVERY		114
6.1 Market Review.....		115
6.2 Resource Recovery Market.....		117
Public Still Highly Supportive of Recycling.....		118
Recycling Rates Higher in Line With Population Density and Disposal Costs		118
Energy Savings from Recycling.....		118
Slight Decline in Curbside Recycling Programs		120
Bolstered by Composting.....		121

Contents

Economic Justification of Recycling.....	121
Economies-of-scale for Large Recycling Companies	121
Record High Commodity Pricing.....	121
Market Stability from Increasing Global Demand.....	122
Market Volatility and Vulnerability to Global Pressures	122
Rising Cost of Transportation	123
Evolving to Buyers Market (Mills) from Suppliers Market.....	124
Declining Supply of Old Newsprint.....	124
Large Corporations are Deploying Sustainability Measures.....	124
State Legislatures Push More Recycling Measures Including Landfill Bans.....	125
Single-stream Recycling to Address Recycling Goals and Higher Transportation Costs.....	125
Still Room to Grow	125
Behavioral Challenge.....	126
The EU as a model.....	126
Development of Secondary Markets Supports the Business.....	126
6.3 Paper Recycling	127
6.4 Plastic Recycling	129
6.5 Aluminum Recycling	132
6.6 Steel Recycling	135
6.7 Glass Recycling	139
6.8 Largest Recycling Companies	140
7 OTHER SOLID WASTE MANAGEMENT SEGMENTS: SPECIAL AND INDUSTRIAL WASTES	
144	
7.1 Scrap Tire Recycling	144
7.2 Construction & Demolition Debris Disposal and Recycling	149
Some Definitions:	150
Relevant Regulations	151
Components of Construction and Demolition Debris Wastes.....	151
C&D Pricing follows a similar pattern to that of MSW.....	158
MSW Pricing Historically Reflects Ratio of Demand for Disposal to Available Capacity (Supply)	160
Available Disposal (Supply) is Represented by Proximity to Landfills and Waste-to-Energy Plants	161

7.3	Food Wastes	165
	Definition	165
	Food Waste Recycling	165
	Unique Challenges	171
	States are Looking to Food Waste as Next Great Opportunity to Meet Recycling Goals	171
7.4	Yard Waste and Composting.....	175
	Source Separation of Organics Advances Slowly	177
	Divert, Don't Dump	179
	Anaerobic Digestion Emerging.....	181
	Compostable Organics out of Landfills by 2012; COOL 2012.....	186
7.5	Wood Wastes.....	189
7.6	E-Wastes.....	191
	Need for Recovery	193
	European Model.....	194
	Take-back Programs.....	195
	Manufacturers Approach.....	195
	Firms Engaged in Recovery	195
	Lack of Regulation Deters Investment.....	196
	Lack of Regulation and Certification	196
	Exporting E-Waste	196
	Responsible Management	197
	Screwdriver Operations.....	200
	Should E-waste Recycling Count Towards State Goals?	205
7.7	Landfill Gas.....	212
7.8	Biomass.....	217
7.9	Waste-to-Ethanol.....	220
7.10	Autoclaving	220
7.11	Gasification and Pyrolysis.....	220
7.12	Plasma-arc.....	221
	Existing facilities.....	222
	Planned facilities	222

7.13	Lamp Recycling	224
8	STRATEGIES FOR SUCCESS	227
9	WASTE MANAGEMENT EQUIPMENT	228
9.1	Waste Management Equipment Market	228
	Rising Steel Prices and Other Problems	233
9.2	Waste Management Equipment Company Profiles.....	236
9.2.1	Compaction America	236
9.2.2	Heil Environmental Industries	238
9.2.3	Morbark Inc	240
9.2.4	Rehrig Pacific Company	243
9.2.5	Leach Company	246
9.2.6	Wastequip	248
9.3	Leading Companies in Waste Management Equipment	251

About Waste Business Journal

Waste Business Journal publishes newsletters, directories and reports, and performs customized research for the waste management industry. WBJ has served this industry for over seventeen years, during which time, the company has accumulated through direct survey and other means a great deal of historical and current industry economic data. Using its proprietary database of waste disposal facilities and companies, WBJ staff regularly analyze waste disposal trends including volumes, prices, and capacity and publishes these findings in a number of its regular reports (available in print and on-line). Waste Business Journal and its president, James Thompson are recognized nationally as leading authorities of the waste industry. The company consults to a variety of clients on issues of strategic, economic, regulatory, and policy issues related to waste management.

The Company is located in San Diego CA and considers itself an industry consultant and member of the professional information publishing business.

About James Thompson, Jr.

James Thompson is President of Waste Business Journal, a research and consulting firm dedicated to the waste management industry. With over fifteen years of experience in the industry, he is a leading expert on waste issues, pricing and business trends in the US. In 1991, he founded Chartwell Information and created Solid Waste Digest, the industry's first and only true quantitative business newsletter. That required his development of the industry's most comprehensive database of pricing, volume and supply statistics.

Mr. Thompson regularly consults with clients on issues of strategic, economic, regulatory, and policy issues related to waste management. His clients include corporations, governments, and agencies of the federal government. He has consulted to every major solid waste firm in the U.S. Consequently, his views have been presented in the Wall Street Journal, the New York Times, the Economist and National Public Radio among many other media.

James Thompson is a graduate of Yale University and holds an MBA from Vanderbilt University.
